PRESS RELEASE

IFISA supports Hellenic AFISO Union

The International Flight Information Service Association (IFISA) regrets the terrible tragedy caused by the train collision in Tempi, central Greece. IFISA expresses its deepest possible condolences to the families of all those who have so tragically lost their lives.

Following the development of the situation, a considerable discussion started for further security improvements throughout the transportation sector.

Air transport and its workforce are essential to Europe's overall transportation system and the continuity of civil aviation.

A functioning, safe and secure air transportation system is vital and necessary for people's efficient and effective movement. Aerodrome Flight Information Service Officers are deemed essential to the safety and continuity of civil aviation.

IFISA supports its member, the Hellenic AFISO Union, on their demand for further safety improvements in all Greek aerodromes where AFIS Officers are stationed.
